LSEG   Nov 2019 –Sep 2022

Lead Software Engineer
Tools: Java 1.8, MySQL, Spring Boot, Spring Integration, AWS, DataDog
- Responsible for leading around 20+ functional changes in the World Check product of LSEG and ensuring the successful release of the functionalities.
- Responsible for leading a project of 5 developers to improve the sort performance of Elastic Search used in one of the services and was able to bring about a performance improvement of around 70% faster response time
- Accelerated value creation by moving to goal focused sprint and ensuring context switches were handled effectively.

Insight UK   Sep 2014 –Nov 2019

Java Developer
Tools: Java 1.8, Oracle 9i, MS-SQL, Spring Boot, Spring Integration, Graphite, RabbitMQ, Kafka, React, AEM
- Responsible for creating REST interface for Gigya and GoCardless and integrating it on the website
- Involved with integrating application with hosting automation solution using Spring integration and providing Rest interfaces for accessing the hosting portal.
- Responsible for delivering Rest interfaces for the Search interface during the Global Redesign initiative
- Responsible for integrating checkstyle into the projects to strengthen the code review process

BT-NHS (Mastek)   July 2013 –May 2014

Technical Analyst
Tools: Java 1.5, Oracle 9i, XML, UNIX, Intel SOA Products Division, Control-M
- Implement techniques to ensure resolution of incident in a timely manner, resolving according to Service SLA's
- Diagnosing the cause of the incident through a structured process of investigation, coordinating both internal and external support teams as necessary, pro-actively looking to identify root cause and prevent repeat occurrence

FCA (Mastek)   Sep 2012 –July 2013

Senior Developer
Tools: Java 1.6, Spring, Hibernate, JPA, UML, Junit, Appian 6.6.1, Hudson/Jenkins
- Identify and create Appian processes based on requirements gathered during SCRUM iteration
- Ensured designed components were handed over to Offshore team and the delivered work package was as per the design
- Provided utopian view of one of the key functionalities which helped in the work package being delivered before estimated time.

Lex Autolease (Mastek)   Aug 2008 –Aug 2012

Lead Developer
Tools: Java 1.6, Spring, Struts, EJB, Hibernate, JPA, Oracle 9i, Maven, Junit, Quality Center, Oracle SOA Suite
- Involved in the design and development of web interface for vehicle quoting and fleet management software which increased efficiency of the vehicle leasing process by 50%
- Responsible for leading a team of 5 developers and defining migration strategy, data mappings for migration, GAP analysis, data analysis and technical solution for de-commissioning source system.

Lex Extranet (Mastek)   Jan 2008 –Aug 2008

Developer
Tools: Java 1.6, Spring, Struts, EJB, Hibernate, JPA, Oracle 9i, Maven, Junit, Quality Center, Oracle SOA Suite
- Providing technical solutions based on the requirements
- Implement the required functionality based on the design document
- Code review functional changes in the system
